About Us

Ventana USA is a custom window and door manufacturer built on craftsmanship, innovation, and a commitment to doing things the right way. We specialize in premium, made-to-order products engineered for performance, serving both residential and commercial projects with precision and reliability.

- **Made in the USA**
- **Customization is our Specialty**
- **Diverse and Thoughtful Product Offerings**
- **Residential and Commercial Experience/Options**
- **Ease of Doing Business**

Our 170k sq. ft. facility located 30 minutes southeast of Pittsburgh, PA employs over 120 highly skilled employees, allowing us to offer superior service & quality. Every product is thoughtfully engineered, precision-built, and backed by our team that genuinely cares about the details. We work closely with architects, builders, and homeowners to bring bold ideas to life, offering a wide range of styles, finishes, and custom options.

At Ventana USA, we believe windows do more than fill an opening – they frame experiences, elevate spaces, and connect people to the places they love. From standout projects in iconic locations to everyday homes that deserve something special, we're proud to be part of spaces that last.

PRECISION DOORS FOR MODERN LIVING.

Our Ventana Select Line of Doors brings together European engineering and American craftsmanship to deliver high-performance solutions for modern living. Designed with precision and built for durability, each door in the Select Line reflects the strength of German engineering while being proudly manufactured in the USA. The result is a collection of doors that not only elevate aesthetics but also enhance comfort, efficiency, and everyday functionality.

The Select Line features three innovative options:

Smart Slide, Smoovio, and Swing Doors—each tailored to meet different design and performance needs.

- Our **Smart Slide Doors** offer effortless operation with a soft-close feature, allowing panels to glide smoothly and stop gently for a refined user experience.
- The **Smoovio System** is engineered for tight spaces, combining the benefits of a sliding door with advanced sealing technology to maximize energy efficiency and weather performance.
- For more traditional applications, our **Swing Doors** provide a timeless look with modern engineering, delivering security, durability, and superior insulation.

Built with high-quality materials and advanced profile systems, Ventana Select Doors are designed to perform in both residential and commercial settings. From expansive openings that invite natural light to space-saving solutions that optimize functionality, this line offers versatility without compromise. With a focus on innovation, performance, and customization, Ventana Select Doors provide architects, builders, and homeowners with a reliable, modern solution that stands the test of time.

The Future of Sliding Doors.

SMART SLIDE

Engineered for modern living, our Smart Slide doors combine advanced security with superior weather resistance.

An innovative multi-point locking system and premium sealing surfaces work together to protect against air infiltration, wind, and driving rain—proven through rigorous LC-PG50 performance testing on a 96" x 84" two-panel configuration. With no brush seals and enhanced locking points, these doors deliver a tighter seal, greater durability, and lasting peace of mind.

Designed to maximize light and space, expansive glass panels create beautifully large openings that seamlessly connect indoor living areas with the outdoors. Smart Slide doors can be manufactured in impressive sizes up to approximately 18' x 8', offering a bold, open feel for any space. For everyday ease, the operating panel—up to 60" wide—features a soft-closing, self-guided locking mechanism that glides smoothly into the frame. The result is a door system that feels as effortless as it is refined—simple to use, reliable, and built to perform.

Unmatched Features

- U values as low as .18
- LC PG50 rated
- Custom Sizing
- Modern Design
- Available with retractable screen
- 140 mm frame or 5.5 inches depth
- Dual pane and triple pane available with US NFRC U-value rating of .28 dual pane and .18 triple pane
- Modern classic-line design
- Concealed hardware technology
- Selection of opening mechanisms: Schema A + C (2 panel + 4 panel)
- Available in numerous decor design

WHY CHOOSE SMART SLIDE

Smart Slide doors aren't just another sliding door—they're a performance upgrade disguised as a sleek design feature. Here's why they stand out

Outstanding Sealing

The innovative locking mechanism and high-quality sealing surfaces with no brushes provide unequalled security. Additional locking points offer outstanding sealing and even more security. As a result, the smart-slide achieves extremely good sealing performance against air, wind and driving rain. (Test No. LC-PG50 for 2-panel door, 96 x 84 inches.)

Shorter Production Time

Only one sash is required because the frame is welded on all sides. The fixed part can be installed directly into the frame using a glazing bead.

Less Maintenance

Less Maintenance Outstanding innovation helped create the very stable hardware used in this door. Reduced maintenance and a sophisticated mechanism simplify the hardware technology

An Innovative Sliding System- For Quality Without Compromise

Benefits of GEALAN Smoovio Sliding Doors

Effortless Operation

Precision-engineered roller systems and advanced closing mechanisms ensure a smooth, effortless glide every time, designed for lasting performance.

Saves & Creates Space

The space-saving design opens up valuable floor area, allowing you to optimize your interior layout and make the most of every square foot.

Waterproof Protection

Enjoy peace of mind with uninterrupted, all-round seals that create a robust barrier against wind and rain, keeping your home comfortable and protected.

Sleek, Modern Design

The slim, unobtrusive profile of GEALAN-SMOOVIO presents a clean, contemporary aesthetic that seamlessly integrates with any architectural style.

Exceptional Thermal Insulation

Multi-chamber profiles and optimized seals deliver superior thermal insulation. This reduces energy consumption, resulting in lower heating and cooling costs and a smaller environmental footprint.

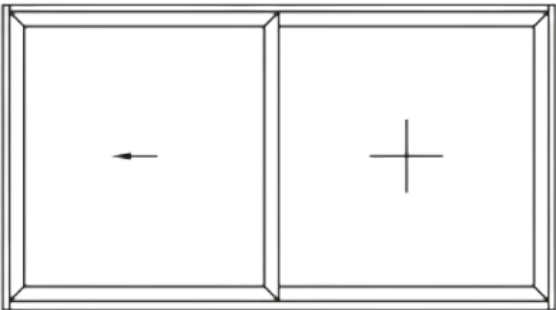

Optimum Noise Protection

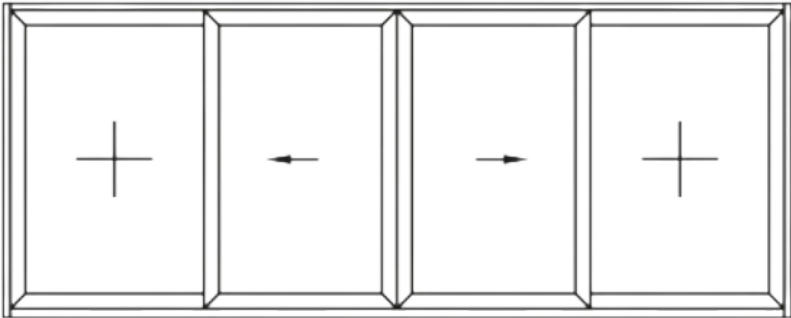

Experience a quieter, more tranquil living environment. GEALAN-SMOOVIO's advanced acoustic insulation significantly reduces the transmission of external noise.

VERSATILE OPENING CONFIGURATIONS

GEALAN-SMOOVIO offers versatile opening configurations to suit various architectural styles and functional needs:

Where Performance Meets Timeless Design

SWING DOORS

Our swing doors are designed to deliver timeless style, superior performance, and unmatched versatility for both residential and commercial applications. Built with precision and care, each door is custom made per job, ensuring the perfect fit for your project—whether it's a modern home, a historic renovation, or a multi-story commercial building. With clean lines, expansive glass options, and standard color selections, these doors are crafted to elevate any space while maximizing natural light

Swing doors feature:

- triple seal system
- superior multipoint locking

These features provide:

- exceptional energy efficiency,
- security
- protection against the elements.

The standard threshold application allows for seamless integration, while inswing and outswing configurations offer flexibility to suit any layout. Every detail is designed with both functionality and long-term durability in mind.

Customization is at the core of our swing door systems. Choose from a variety of hardware options and configurations, including single swing, French doors, and swing doors with sidelights, to create a solution tailored to your vision. Whether you're designing for a residential entryway or a large-scale commercial project, our swing doors combine European-inspired engineering with American craftsmanship to deliver performance you can trust and design that stands out.
