GARDEN WINDOWS 2026

Series 2050 | Series 2050i | Series 2051 | Box Bay 90-Deg

Open Up Your Space, Add Light

Open any space in your home with a garden window and create a beautiful setting for your plants, collectibles, or decorations. It could be the perfect finishing touch for your kitchen, bath, make-over, remodeling project or new home. We offer three different types of garden windows and a bay window

Series 2050

**Distinctive
Design-
Excellent
Performance.**

FEATURES

- Both vents and deadlites have a built-in weep system and external glazing.
- A structural silicone is used to glaze the top slope and vertical deadlite portions of the unit.
- Snap-in sill cover for seat board provides aesthetic appeal and weather resistance.
- Exterior grade plywood head board, seat board and jamb are 1-1/4-inch for improved structural and thermal performance.
- Engineered for new construction and remodeling applications.
- Standard garden window jamb depths of 4-9/16, 5-1/4, 6-9/16, and 11 inches are available as well as custom jamb depths to fit any application.
- Fully welded, rigid PVC frame for greater strength and stability
- The center mullion contains aluminum and steel reinforcements
- Vinyl frame will not hip, rot or peel and will never need to be painted

OPERATING SASH

- Locks and operators are conveniently mounted to the inside front area for easy access.
- Operators are sealed to prevent air and water infiltration.
- Twin sealing, fully screened, operating casements with external glazing for improved weather protection.
- The screens have a high-performance spring steel frame that is captured in the screen track and can be easily removed from inside the home. You will no longer see a screen frame and will gain more viewing area through the glass.
- The multi-point locking system provides a tighter seal and additional security

Built to Weather The Storm.

Series
2050i

The Series 2050i is the only impact-rated garden window on the market today. Intertek/Architectural testing certified that it meets an ASTM Design pressure of 50, Missile Impact Level D, and Wind zone 3. It also has received Florida Building Code Approval (FL 17444).

The only visible difference between the 2050 and 2050i is the thickness of the front mullion. Custodial locks on both casements provide severe weather protection.

The only **impact-rated** garden window on the market!

FEATURES

- The aluminum-reinforced center mullion is wider and thicker for extra strength.
- All IGs with .090 laminated glass.
- Custodial lock on both casements.
- Maximum size is 63 x 63 inches.
- Knee brace supports are required and are provided with each order.
- Other features remain the same as the Series 2050: Series 2050i Impact-Rated Garden Window
- Fully welded, rigid PVC frame for greater strength and stability.
- Vinyl frame will not chip, rot or peel and will never need to be painted.
- Clear 1-inch insulated glass package.
- The top slope is a constant 35-degree pitch.
- The projection of the window from the exterior wall face is a constant 17 inches

Series 2051

The Series 2051 garden window is explicitly designed for stucco remodeling applications and installs like a new construction window. It incorporates aluminum nail flanges for mounting directly to the outside of an existing window frame (knee braces are required for support).

FEATURES

- The Series 2051 stucco replacement garden window has an AAMA Certified R-50 rating for units 60.5 x 60.5 inches and smaller.*
- Fully welded, rigid PVC vinyl frame for greater strength and stability.
- Aluminum and steel reinforcements in the front mullion.
- Vinyl frame will not chip, rot, or peel and will never need to be painted.
- Clear 1-inch insulated glass package.
- Top sloped insulating glass (a constant 35-degree pitch) is tempered for improved safety and unit integrity.
- The projection of the window from the exterior wall face is a constant 17 inches (cannot be modified).
- Both vents and deadlites have a built-in weep system and external glazing.
- A two-part structural silicone is used to glaze the top slope and vertical deadlite portions of the unit.
- Snap-in sill cover for seat board provides aesthetic appeal and weather resistance.
- Snap-in corner slope closure profile assures a tight weather seal.
- Exterior grade plywood seat board, is 1-1/4-inch for improved structural and thermal performance.
- The window is shipped completely assembled for easy installation.

OPERATING SASH

- Locks and operators are mounted to the inside front area for easy access.
- Operators are sealed to prevent air and water infiltration.
- Twin sealing, fully screened, operating casements with external glazing for improved weather protection.
- The multi-point locking system provides a tighter seal and added security.

No Disruption to Interior Wall.

FEATURES

- Fully welded, rigid PVC vinyl frame for greater strength and stability.
- Vinyl frame will not chip, rot, or peel and will never need to be painted.
- Both vents and deadlites have a built-in weep system and external glazing.
- Exterior grade plywood head board, seat board and jamb are 1-1/4-inch for improved structural and thermal performance; support brackets are not needed.
- Clear 1-inch insulated glass is provided for all-weather protection.
- Snap-in covers for the head board and seat board provide aesthetic appeal and weather resistance.
- The projection of the window from the exterior wall face is a constant 17 inches.
- The window is shipped completely assembled for easy installation.
- Engineered for new construction and remodeling applications.
- Standard garden window jamb depths of 4-9/16, 5-1/4, 6-9/16, and 11 inches are available as well as

Series 2500 Box-Bay 90 Degrees

OPERATING SASH

- Locks and operators are mounted to the inside front area for easy access.
- Operators are sealed to prevent air and water infiltration.
- Twin sealing, fully screened, operating casements with external glazing for improved weather protection.
