

Architectural Single-Hung Window

Expand your vinyl window line by adding custom architectural shapes.

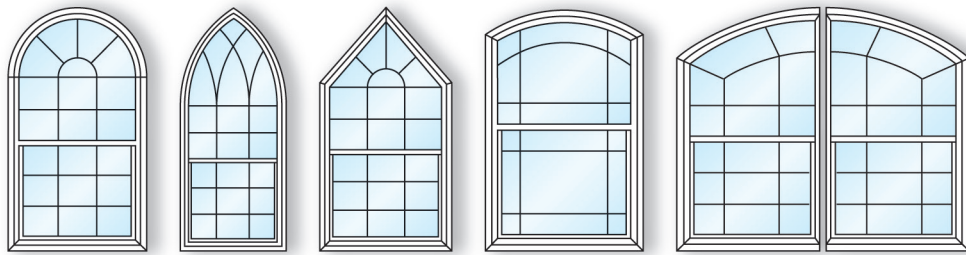

These single-hung units can be designed to fit any window scheme, from colonial to contemporary. Whether they're for the manufactured housing market or a custom-built home, the process is simple:

- Provide us with a completed single-hung unit¹ manufactured to the height² and width of your finished product; unglazed.
- Using your single-hung profile³ we will create a custom shape header fabricated to your specifications.
- We will complete the window according to your glass specifications: glazed,⁴ semi-glazed or unglazed.

- 1 Twin mulled single-hung units also can be fabricated.
- 2 Finished product size is the size of the unit including the arch, circle top or peak for correct centered meeting rail replacement.
- 3 Required design and engineering specifications must be met for bending purposes.
- 4 Glazed units use Super Spacer* warm edge technology which provides superior thermal performance.

Complement your window style with our complete line of creative grids, color-matched to the frame in flat or contour profiles.
